HISTORY

Professors Sachse, Chairman, Borrowman, Carstensen, Current, Curti, Easum, Edson, Harrington, Hesseltine, Hill, Jensen, Jones, Moss, Petrucci, Post, Reynolds, Shannon, Williams, Willie; Associate Professors Boardman, Cameron, Curtin, Hamerow, Lampard, Phelan; Assistant Professors Litwack, Lovejoy; Instructors Kindbegan, Metcalf

History, the written memory of mankind, is the story and interpretation of man's experiences and achievements in the development of the state and institutions. It is the story of law and order, economic and social interests, religion, learning, literature, and the arts. It is a product and an essential part of civilization, history is indispensable to the education of civilized men and women in the ideals and traditions that distinguish them from the animals. History is an important aid to the study of related subjects, notably the humanities (languages and literatures, philosophy, music, and art) and the social studies (law, sociology and anthropology, economics, cultural and historical geography, the history of science, political science, international relations, and psychology).

The Department of History offers courses for either a general knowledge of the history of civilization or a special knowledge of the history of particular topics and limited periods. Students may major in History for historical knowledge, teaching, research, or state service.

Major in History: A minimum of 30 and no more than 40 credits as follows:

1. At least 12 credits of European History, 6 of which must be taken in History 1, 2, 3, 5, and 10. This requirement must include some Ancient or Medieval History. History 5a counts as Medieval History. LL-S, 12 (3 credits) and 22 (4 credits) are accepted as equivalent to History 1 and 2.

2. Six credits in American History.

3. At least 15 credits in advanced history courses (numbered 100-199), taken in residence at the University of Wisconsin. Advanced courses taken under 1. and 2. above count toward these 15 credits.

Major in the History of Culture, A student may choose to major in the History of Culture to emphasize the cultural aspects of historical development. He must meet the requirements outlined above, under 1 and 2, and offer 12 credits in advanced courses in history, chosen so as to cover a logical segment of European or American cultural history. In addition, in consultation with his advisor, he must choose at least 8 credits in advanced courses in related departments in humanities or social studies (for example, Latin-American history and Spanish literature and art; Greek history and ancient philosophy and science; American history and law and political theory). When the student's interest lies in the cultural history of a period or country outside the English or United States fields, he must take an attainment examination or its equivalent in course work in the appropriate foreign language.

Major in Hispanic Studies. (See page 77.)

Joint Major in History and History of Science. The joint major demands 18 credits in introductory courses: 6 credits in History 1, 2, 3, 5, or 10; 6 credits in History 4; and 6 credits in History 1. In addition, 18 credits are required in advanced courses, of which at least 6 must be either in History or in History of Science.

Honors and High Honors in History. Students majoring in history who have a grade-point average of 3.0 or better, and 24 credits in history, may at the end of their junior year enroll for honors in history. They are required to register in small tutorial sections, numbered 150a and b, carrying 3 credits per semester, which meet in weekly two-hour sessions.

The work will consist of reports on reading, discussions, and brief research papers. Its purpose is to fill gaps in the student's training in
history, to make him acquainted with historical literature not touched on in lecture courses, and to bring his study of history into focus. Regular attendance at these conferences is of primary importance, and three absences will result in automatic withdrawal from the course.

For honors in history, the student must have had a 3.5 average in his major, including the tutorial course, at the end of his senior year. For high honors, the student is required to write a thesis which may be worked in with assignments for tutorial sections or substituted for them. In addition, the recipient of high honors must have an over-all grade-point average of 3.5.

HISTORY OF SCIENCE

Professors Clagett, PhD; Associate Professors Stauffer, Chairman, Hieber, Sonnedecker, Stahlman

Courses in the history of science are designed to give a general knowledge of the development of science, its fundamental ideas, men, and methods. An elementary knowledge of at least one science is required, and a previous course in history is desirable. No course in this department is open to freshmen.

Major. 32 credits of historical work and one year of advanced work in a department within the Divisions of Biological Sciences or Physical Sciences.

For the historical work at least 22 credits must be offered from the history of science courses listed under Group A, and at least 6 credits from the history courses listed under Group B. The remaining credits may be selected from any of the courses listed under Groups A, B, or C, or similar courses which may be added in the future.

Any major in the History of Science must have his program approved by the department. If he is considering advanced work in the field, he should make early plans to acquire the foreign languages necessary as tools for research.

Group A

Starred seminars will vary in subject matter; they may be taken more than once for credit.
