Course Description:
This research seminar explores the history of South Asians who migrated from the Indian subcontinent to different parts of the British empire over which “the sun never set” from the mid-nineteenth century onwards. They served in a variety of roles within the colonial economic structures of different British colonies as indentured laborers on plantations, contract labor in the construction of railways, and financiers and traders who facilitated the spread of colonial rule. During the first 10 weeks students will learn through weekly assigned readings and discussions about Indian traders in East Africa and Southeast Asia; Indian indentured laborers in Fiji, Mauritius and the Caribbean; Indian political activism and the making of a “mahatma” (Gandhi) in South Africa; African and Indian political collaboration in Kenya; and the post-colonial expulsion of South Asians from East Africa to Britain in the late 1960s-early 1970s. Students will be introduced to a range of historiographical works that shift away from histories of South Asia and colonialism that are anchored to territorial boundaries. They will also read two works of postcolonial fiction, an important genre of literature, relating to the themes of identity, colonialism, migration and multiculturalism. Through the assigned readings students will be urged to think about the varied, comparative and connected transregional experience of colonial rule from the perspective of the South Asian diaspora across the British Empire. They are expected to write one long final research paper based on primary sources and secondary literature on a topic related to the course. Students will work towards this from early in the semester but especially after the pre-assigned readings have been discussed in class.

By the time you graduate from this class you will have developed several important skills that will serve you well as you go forward including learning how to define important historical questions, collecting and analyzing evidence, oral and written presentations of conclusions, and contributing to ongoing discussions.
Please Note: The history department reserves the right to collect information, including copies of papers, for the purposes of assessing, improving and accreditation of this course and the history major.

Assignments:
