College of Letters and Science

ation for graduate programs here and in other major universities.

The elementary courses in Hebrew are planned both for those who have begun the language in high school or elsewhere and for those who take it for the first time in college. One unit (one year) of high school work is the equivalent of 4 credits of college work, but all students are assigned to courses on the basis of placement tests. These tests may admit a student to a more advanced course, but give no credit toward graduation. (For information on acquiring credit for foreign language work taken in high school, see Credit by Course Examination in this Bulletin.)

See Chapter on General Requirements for description of foreign language attainment examinations.

Honors Program

To earn the B.A. or B.S. with Honors, majors in Hebrew Studies must complete (a) the L & S general course degree requirements, (b) the Honors Program requirements, and (c) the junior-senior honors curriculum in the department.

Junior-Senior Honors Curriculum. Of the 28 credits in advance of 102 or 324, 6 credits are to be taken in 681 and 682, each 3 credits, Senior Honors Thesis.

Of the remaining 22 credits, at least 10 are to be taken through honors courses or by doing additional work, as specified by instructor, in courses numbered 300-699. Two to four credits may be taken in another Semitic language offered by the Department.

The normal distribution requirements for the major will apply, but exceptions are allowable. Honors students will plan each semester's program with the Departmental Honors Adviser.

Major

The Hebrew Studies major may be earned with an emphasis in either modern or biblical Hebrew. The modern sequence requires a minimum of 24 credits in the Hebrew department above 202 (second year level), as follows: 301-302; 401-402; 341 or 471; 342 or 472; 6 credits of electives.

The biblical sequence requires a minimum of 25 credits in the Hebrew department above 224 (second year biblical), as follows: 513-514; 641-642 or 651-652 or 653-654; 451 or 471; 623-624; 6 credits of electives.

Majors in Hebrew Studies are encouraged to spend the junior year at the Hebrew University in Jerusalem. (Students preparing to become teachers in elementary or high schools should consult the *School of Education Bulletin*.)

Majors in Hebrew must be certified as competent in expository English by the department. One or more term papers written for courses in the department may give evidence of proficiency; however, when circumstances warrant, papers completed for courses taken in other departments may be used to substantiate proficiency. It is the student's responsibility to request certification through the chairman.

Undergraduate Adviser: Linda Newman, 4118 Humanities

History studies changes in human civilization over time. At its best it is a fascinating story perpetually retold by the present generation. The challenge always is to create a story out of the available data. In Africa the data may be human memory, stories of the grandfathers remembered in the present; in twentieth century America the data piles up around us: daily newspapers, statistical tables, and computers to record it all. In its collection and analysis of data, history is a social science; in its insistence on a well-wrought story, it is an art. Students major in history to learn about the human past, to learn to think and write critically, and to learn sophisticated methods of data analysis.

Major in History

To be accepted as a major in the Department of History the student must have attained junior standing. All prospective majors must consult and register with the departmental undergraduate adviser.

A minimum of 30 credits is required. A history major may complete up to 40 credits in history and must complete at least 80 credits outside the major. Requirements follow:

1. At least one course in United States history, one course in European history, and one course in the history of the Third World (Africa, Asia or Latin America).
2. At least one of these three required courses must deal with the History of Europe and/or the Mediterranean before A.D. 1500 or with the history of Africa or Asia before these areas fell heavily under European influence.
3. At least one history seminar course chosen from History 283-284, 481, 482, 571, 572, 573, or 574.
4. At least 15 credits in upper level course work (300-699), taken in residence at UW-Madison with at least a C average. Advanced

courses taken under 1 and 2 above count toward fulfilling this requirement.

5. Certification of competence in written English. The History Department certifies the expository English language competency of any of its students who have successfully completed the history major. This certification will be automatically noted on the student's record by the Degree Summaries Office upon completion of the requirement.

6. Courses are grouped below according to which major requirement they fulfill. No list can be either complete or definitive. Questions about which courses fulfill which requirements should be directed to the undergraduate adviser.

Major in the History of Culture

A student may choose to major in the history of culture to emphasize the cultural aspects of historical development. A minimum of 30 credits and a maximum of 40 credits in history courses are required, to include the following:

At least one semester course in U.S. history; at least one semester course in European history; at least one semester course in the history of the Third World (Africa, Asia or Latin America); at least one of these three required courses must deal with the history of Europe and/or the Mediterranean before A.D. 1500 or with the history of Africa or Asia before these areas fell heavily under European influence; at least three semesters of advanced history courses chosen to cover a logical segment of European or American cultural history. In addition, in consultation with an adviser or professor in the major area of interest, students must choose at least three advanced courses in related departments in humanities or social studies (for example, Latin American history and Spanish literature and art; Greek history and ancient

philosophy and science; American history and law and political theory). When the students' interests lie in the cultural history of a period or country outside the English or American fields, they must take an attainment examination or its equivalent in course work in the appropriate foreign language. Students should discuss this major with the undergraduate adviser in the history department, Linda Newman, 4118 Humanities, for consultation on an appropriate program.

Joint Major in History and History of Science

A minimum of 30 and a maximum of 40 credits in History and History of Science, distributed as follows:

1. At least four courses in history. At least one of these courses must be in United States history, at least one must be in European history, and at least one must be in the history of the Third World (Africa, Asia, or Latin America).
2. At least four courses in the history of science. Students are urged to take one or more of these from the 300-399 series.
3. At least 15 credits of upper level course work (as defined by each department) of which at least 6 credits must be in history courses and at least 6 credits must be in history of science.
4. Knowledge of a science is recommended but not required for the joint major.

Students should not declare this joint major before discussing it with the Undergraduate Adviser in History and with the Chairman of the History of Science Department.

Honors Program

To earn the B.A. or B.S. with Honors, majors in history must complete (a) the L & S general course degree requirements, (b) the Honors Program requirements, and (c) the junior-senior honors curriculum in the department.

Junior-Senior Honors Curriculum. Of the 30-40 credits required for the major, 6 must be in the undergraduate colloquia (571-574). In addition, a Senior Honors Thesis (681-682) is required. The topic of the thesis should be selected after consultation with the professor in the student's field of interest. Students must maintain a general grade-point average of at least 3.0 and a grade-point average of at least 3.5 in the Department of History. Additional information is available from the Honors Adviser in the History Department, Linda Newman.

Honors candidates majoring in other departments. Honors candidates who are not majors in history may still take any of the honors courses offered in the History Department with the exception of the Senior Honors Thesis (Hist 681-682). Enrollment preference will be given to history majors to limit the size of the classes, but students from other departments are welcomed and encouraged to take advantage of the course offerings.

Distinction in the Major

Students who are not L & S candidates for honors may work for Distinction in the Major.

To be granted this award the student must inform the Undergraduate Adviser at least one month before graduation that the following requirements have been met: (1) The student must complete either two semesters of history seminars chosen from 571, 572, 573, 574, or write an acceptable senior thesis, registering for History 691-692 during the senior year. The thesis topic should be selected in the spring of the junior year after consultation with the professor with whom the student wishes to work, and registered with the Undergraduate Adviser in History. (2) The student must have a 3.5 average in the major.

Thesis of Distinction

Students not enrolled in the L & S Honors Program and not working for Distinction in the Major may qualify for the honor of Thesis of Distinction. This is granted for an exceptionally good or original thesis written in History 691-692, without consideration of the student's record in any other courses. Normally the thesis topic and the professor with whom the student wishes to work should be selected during the spring of the junior year, and registered with the Undergraduate Adviser in the History Department.

HISTORY OF SCIENCE

4143 Helen C. White Hall, 262-1406

Professors Coleman, Lindberg, Numbers, Risse, Siegfried, Sonnedecker; Associate Professors Hilts, Leavitt, Reynolds, Siegel; Assistant Professor Neu.

Undergraduate Adviser: Prof. Daniel Siegel, 4143 Helen C. White Hall, 2-1406

History of science is a relatively new discipline, having affinities with both history and science. It makes contact with general history through its concern with the role of science and technology in the development of cultures and civilizations. It makes contact with the sciences through its concern with the development of methods and concepts in the various scientific disciplines. History of science courses, including courses in the history of technology and the history of medicine, are popular electives, supplying a humanistic-social perspective on science for students with scientific and technical majors, and supplying insight into the nature of the scientific process for humanities and social studies majors. Premedical students and others in the health sciences will find these courses attractive either as electives or as part of a major.

Major

The history of science major is a broad, interdisciplinary major, incorporating, in addition to a core of history of science courses, substantive training in one of the following areas: 1. Biomedical Sciences; 2. Physical Sciences/Technology; 3. Social Aspects/Social Science; 4. General History. The science-oriented options, 1 and 2, will appeal to students who like science but would find a science major constraining. Option 1, Biomedical Sciences, provides a unique opportunity for students in the health sciences to obtain, in conjunction with the requisite technical training, a broad historical perspective on both basic science and medical practice. Any of these options would be appropriate preparation for careers (such as journalism, law, library science, or government service) in which a knowledge of the nature of science and technology and an understanding of their role in society would open up specialized career tracks. The department may be consulted for specific career information.

Major Requirements

Option 1 Biomedical Sciences: 21 credits in history of science, with an emphasis on history of biology and/or history of medicine, along with 20 credits in science, constituting a coherent program oriented toward biomedical science and involving at least 8 credits beyond the elementary level. Premedical students will automatically complete the biomedical science requirement.

Option 2 Physical Sciences/Technology: 21 credits in history of science, with an emphasis on history of the physical sciences and/or technology, along with 20 credits in physical science, mathematics, and applied science, constituting a coherent program and involving at least 8 credits in physical science beyond the elementary level.

Option 3 Social Aspects/Social Science: 21 credits in history of science with an emphasis on the social aspects of science and/or the history of the social and behavioral sciences, and 20 credits in particular social and behavioral sciences and/or in courses relating to the sociology, economics, or politics of science.

Option 4 General History: Typically 15 credits in history of science and 15 credits in history. This option is jointly administered by the History Department and the History of Science Department, and is more fully described under *Joint Major in History and History of Science* on page 00.

The 21 credits in history of science required in options 1, 2, and 3 must constitute a coherent program and include the senior seminar for majors (Hist Sci 555). At least 15 of the 21 credits must be beyond the elementary level. One three-credit course toward the total of 21 credits may be chosen from approved courses in related disciplines.

Courses applicable to the 15-credit residence requirement: History of Science courses beyond the elementary level; courses in other departments, as specified in options 1-4, according to the residence rules of the offering department.

Certification of competence in expository English is normally accomplished on the basis of writing done in the senior seminar for majors, Hist Sci 555.

Those wishing to major in the history of science should consult with the department as early as possible, and must have departmental approval of their program.

201 The Origins of Scientific Thought. Rep; 3 cr (H-E). Emergence of scientific method and scientific modes of thought out of ancient philosophical and religious traditions; the impact of ancient science on medieval Christendom; the origins and development of the Copernican-Newtonian world view. Lindberg.

203 Science in the Twentieth Century: An Historical Overview. Sem; 3 cr (Z-E). Major themes in the physical and biological sciences from 1890 to the present, with attention to conceptual development, interaction of science and society, philosophical issues, and personalities in science. Siegel.

204 Newton, Darwin, and Freud: Makers of the Modern World. Sem; 3 cr (H-E). Historical background, personal achievements, and historical consequences of these three major contributors to the contemporary world view. Not open to students who have had Hist Sci 202. Siegfried.

205 The Sciences of Man. Sem; 3 cr (H-E). Development of humanity's attempt to achieve self-knowledge through the methods of science. An overview of the emergence of the social and behavioral sciences. Hilts.

206 History of Astronomy and Cosmology. (Also Astron 206.) Sem; 3 cr (H-I). The development of astronomical knowledge and cosmological views from the earliest times to the present, viewed in their social, philosophical, and technological contexts. P: So st. Siegfried, Bless.

207 History of Pseudo-Science and the Occult. Sem; 3 cr (H-I). Occult and pseudo-scientific traditions within Western thought from the Middle Ages to the present. P: So st. Siegfried.

Physician, patient and social relationships, changing disease theories and therapeutic procedures, and the creation of varied institutional frameworks for medicine and public health. Coleman.

232 Health and Social Welfare in Western Society. Sem; 3 cr (H-I). The rise of public concern for human well-being in the European nations from preliteracy society to the twentieth century. Greek individualism and Christian charity, the shift from ecclesiastical to secular responsibility, the sanitary movement and the development of a scientific basis for public health, and emergence of contemporary public health issues. P: So st. Coleman.

311 Schools and Learning in the Medieval World. (Also Med St 311.) Sem; 3 cr (H-I). An introduction to the various forms of education in the Middle Ages and their effects. Some attention to the medieval origins of such modern educational institutions as the public grammar school and the University. P: Jr st or cons Inst. Courtenay.

322 Ancient and Medieval Science. (Also Medieval 322.) Sem; 3-4 cr (H-I). Scientific ideas and institutions from the beginnings of Greek philosophy to the Renaissance. Fourth credit requires additional work. P: Jr st. Lindberg.

323 The Scientific Revolution: From Copernicus to Newton. (Also Hist 323.) Sem; 3-4 cr (H-I). Major ideas and events in the physical and life sciences in the sixteenth and seventeenth centuries. Fourth credit requires additional work. P: Jr st. Lindberg.

324 Science in the Enlightenment. Sem; 3-4 cr (H-I). Eighteenth century triumph of gravitational astronomy; Newtonian matter theory; Lavoisier and the chemical revolution; theories of the earth, and the beginning of geology; science and religion. Fourth credit requires additional work. P: Jr st. Siegfried.

325 Development of Modern Physical Science. Sem; 3-4 cr (H-I). Major themes in the physical sciences (mainly physics and related developments in chemistry and astronomy), late eighteenth through early twentieth centuries—from the Newtonian synthesis to the Einsteinian revolution. Broad historical approach, appropriate for both science and nonscience majors. P: Jr st. Siegel.

327 Science, Technology and Society. Sem; 3-4 cr (H-I). Effect of application of scientific knowledge on technology, medicine, and agriculture with attention to resultant problems raised for government and society. Fourth credit requires additional work. P: Jr st. Hilts.

330 History of Early Biology. Sem; 3 cr (H-D). Survey of major developments in biology and related sciences from Greek antiquity to 1800. The rise of natural history and physiology, the transmission and later modifications of classical science, and the place of biology in the scientific revolution. P: Jr st or cons Inst. Coleman.

333 History of Modern Biology. Sem; 3 cr (H-I). Survey of major developments in biology and related sciences ca. 1700-1950—morphology and embryology; evolutionary theory, ecology, and genetics; physiology and recent experimental biology. P: Jr st or cons Inst. Coleman.

343 The Darwinian Revolution. Sem; 3 cr (H-D). Scientific, social, religious, and related dimensions of the evolution hypothesis from pre-Darwinian speculation and Darwin's own work to late support, criticism, and continuing investigation. Coverage reaches into the twentieth century. P: Jr st or cons Inst. Coleman.

353 Ecology and Environmental Thought. Sem; 3 cr (H-D). The development of the ecological point of view and related scientific and social attitudes. Material from ca. 1750 through the mid-twentieth century is covered. P: Jr st or cons Inst.

394 Science in America. Sem; 3 cr (H-D). From the colonial period to the present, with emphasis on the development of scientific institutions and the influence of science on American life. P: Jr st or cons Inst. Numbers.

401 History of Pharmacy. (Also Pharm 401.) I; 2 cr (H-I). Pharmaceutical field from antiquity to modern medical care; professional structuring in principal countries of the West. P: Jr st. Sonnedecker.

402 History of the Use and Misuse of Psychoactive Drugs. Sem; 2 cr (H-I). Analyzing concepts, trends, and problems related to the use of psychoactive drugs throughout history. P: Jr st.

405 Science in the Twentieth Century. Sem; 3 cr (H-I). Major themes in the physical and biological sciences from 1890 to the present, with attention to conceptual development, interaction of science and society, philosophical issues, and personalities in science. P: Jr st or cons Inst. Not open to students who have had Hist Sci 203. Siegel. (Pending Approval.)

410 Evolution of Food and Drug Controls. (Also Pharm 410.) Sem; 3 cr (H-I). Historical development of standards and controls for food and drugs to insure safe, wholesome and effective products for the public; impact of science and technology on the food and drug industries; focuses on the nineteenth and twentieth centuries in the U.S. P: Jr st.

461 The Roots of Twentieth Century Physics. Sem; 3 cr (H-I). Origins and development in the nineteenth and early twentieth centuries, of thermodynamics, atomic physics, quantum theory, and related topics. Course requirements
