I. COLLEGE OF ARTS.

The College of Arts is organized under the following section of the General Laws of 1866, Ch. CXIV:

SECTION 2. The College of Arts shall embrace courses of instruction in the mathematical, physical and natural sciences, with their application to the industrial arts, such as agriculture, mechanics and engineering, mining and metallurgy, manufactures, architecture and commerce; in such branches included in the College of Letters as shall be necessary to a proper grasp of the pupils in the scientific and practical courses for their chosen pursuits; and in military tactics; and as soon as the income of the University will allow, in such order as the wants of the public shall seem to require, the said courses in the sciences and their application to the practical arts, shall be expanded into distinct colleges of the University, each with its own faculty and appropriate title.

The object of this section is to provide, not only for a general scientific education, but also for such a range of studies in the *applications of science* as to meet the wants of those who desire to fit themselves for agricultural, mechanical, commercial, or strictly scientific pursuits. The courses of study are such as to provide a sound education in the elements of science, and at the same time to give great freedom in the selection of studies according to the choice of the individual student. As higher demands are made, they will be met, by adding to the list of elective studies, and by the enlargement of the Faculty of Arts, so as to form distinct colleges, as provided for in the act of reorganization.

This College embraces the Departments of General Science, Agriculture, Civil Engineering, Mining and Metallurgy, and Military Science.

DEPARTMENT OF AGRICULTURE.

It is the design of the University to give in this Department a thorough and extensive course of scientific instruction, in which the leading studies shall be those that relate to agriculture. The instruction in this course will be given with constant reference to its practical applications, and the wants of the farmer.

The University farm is used to aid this department in conducting experiments in Agriculture and Horticulture.

Students can enter this, as all other departments of the University, at any time upon examination; can pursue such studies as they choose, and receive a certificate of attendance.

The analytical laboratories are connected with this department.

POST-GRADUATE COURSE.

Bachelors of Art, Science, and Philosophy will be admitted to the University as candidates for an appropriate degree. They must devote two years to study under the direction of the President and Faculty, and pass a satisfactory examination before the Board of Examiners appointed by the Regents.

The studies are optional; but they must be selected from at least two sections, and the studies in some one section must be continued during the whole course.

The object of this course is to secure a higher grade of scholarship in Literature and Science than it seems possible to attain in the present state of our colleges, under the ordinary class-system.

LECTURES.

In addition to the lectures given in connection with the recitations, some subjects are taught entirely by lectures, the students being required to take notes, and to recite upon the lectures as from a text-book.

The following are the regular courses of lectures:

To the SENIOR CLASS, on Mental and Moral Philosophy and Æsthetics, by the President; on Rhetoric and Logic, by Prof. Carpenter; on History, Political Economy, Civil Polity and International Law, by Prof. Allen; on Geology and Economic Geology; on Mining Engineering, and on Metallurgy, by Prof. Irving; on Science of Language, by Prof. Feuling.

To the JUNIOR CLASS, on Physics and Astronomy, by Prof. Davies; on History, by Prof. Allen; on English Literature, by Prof. Carpenter; on General, Analytical, and Applied Chemistry, by Prof. Daniells; on Metallurgy and Assaying, by Prof. Irving, and on Comparative Philology, by Prof. Feuling.

To the SOPHOMORE CLASS, on History, by Prof. Allen.

To the FRESHMAN CLASS, on the Laws of Health and Methods of Study, by the President.

In addition to these courses, other Lectures are delivered on Special Subjects, by members of the Faculty and other Scientific Gentlemen.
